

OccasionWear — Requirements & Risk Register

Purpose: single organized source for the product requirements (MVP + future roadmap) and a prioritized risk register with mitigations and owners. Use this document to onboard team members, share with partners, and import items into your delivery tool.

1. Quick summary

- Goal: validate a minimal marketplace for rental/sale/consignment of occasion clothing in Syria (shops + tailors + individuals), with a guarded custom-order and proxy-order pilot.
 - Key success metrics (MVP): 50 suppliers onboarded, 200 bookings in first 90 days, >70% of transactions completed on-platform.
-

2. MVP Requirements (Now — Scope for first release)

Deliver a working marketplace with consignment support and a minimal custom-tailor lead flow.

Core user roles

- Renter (customer)
- Supplier (shop / tailor)
- Individual owner / consignor
- Proxy agent (pilot)

- **Admin / Ops**

Functional features

1. **User accounts & roles** — signup/login, basic verification. (*Priority: High — Complexity: Low*)
2. **Supplier / Tailor / Shop profile** — gallery, bio, location, hours. (*High / Low*)
3. **Item listing (Rent / Sell / Consign)** — images, sizes, price/day, price, availability calendar, owner_type flag. (*High / Medium*)
4. **Search & filters** — date, size, location, price, type. (*High / Medium*)
5. **Booking flow (rent)** — hold date → deposit/full payment → confirmation; support COD. (*High / Medium*)
6. **Purchase flow (sell)** — checkout + escrow until delivery/acceptance. (*High / Medium*)
7. **Consignment intake workflow** — consignment request form, shop inspection, photo intake, digital consignment agreement. (*High / Medium*)
8. **Supplier / Shop dashboard** — manage listings, accept/reject bookings/consignments, earnings summary. (*High / Medium*)
9. **In-app chat** — paste-redaction, contact masking until paid. (*High / Medium*)
10. **Payments & escrow flag** — deposit handling, payment status flags. (*High / Medium*)
11. **Order management for users** — upcoming bookings, returns, receipts. (*High / Low*)
12. **Ratings & reviews** — item and supplier ratings. (*High / Low*)
13. **Admin panel & reconciliation** — consignment approvals, payout control, dispute triage. (*High / Medium*)
14. **Returns / damage claim flow** — evidence upload, inspection window, escrow holds. (*High / Medium*)
15. **Minimal custom request form** — upload design/photo, material option (tailor / client), quote request, deposit to unlock contact. (*High / Low*)

16. **Appointment scheduling** — in-app calendar for measurement/fittings. (*High / Low*)
17. **Payout scheduling** — owner/shop payout tracking & admin release. (*High / Low*)
18. **Legal templates** — consignment agreement + client-fabric waiver (store signed PDFs). (*High / Low*)
19. **Proxy-order pilot UI (manual workflow)** — request/quote form for agents, manual reconciliation. (*High / Low*)

Non-functional requirements (MVP minimum)

- TLS everywhere; do not store raw card data. Use PCI-compliant processors. (*Security*)
 - Mobile-first responsive UI; critical flows <2s on common mobile. (*Performance*)
 - Logged audit trail for consignment intake, payouts and disputes. (*Auditability*)
 - Data retention & privacy: measurement photos & IDs encrypted and deletable by user request. (*Privacy*)
-

3. Future / Phase 2 & 3 Features (defer until validation)

Phase 2 (after market validation)

- Masked phone routing / proxy numbers (call/SMS forwarding). (*Medium–High*)
- Milestone escrow for custom-tailor work (pattern → fitting → final) with staged releases. (*High*)
- Material / fabric catalog (swatches, price/meter, stock, lead times). (*Medium*)
- Measurement tools: photo-guided self-measure, measurement profile storage. (*Medium*)

- Try-before-you-rent flows: home trial or in-store trial management. *(High)*
- Advanced commission splits & automated payouts for consignment sales. *(Medium)*
- Shop inventory management (shelf codes, intake/dispatch logging). *(Medium)*
- Agent marketplace for proxy buying (agent profiles, quotes, reputation). *(Medium)*
- Partner integrations (couriers, dry-cleaners) — API or manual workflows. *(Medium)*

Phase 3 (scale & differentiation)

- AR / virtual try-on, fit prediction. *(High)*
 - Insurance product integration (third-party). *(High)*
 - ML-powered leakage detection & behavioral models for off-platform deals. *(High)*
 - Subscription / credit-pass membership plans. *(Medium)*
 - Automated international shipping & customs workflows for proxy orders. *(High)*
 - Photographer / styling add-on booking flows. *(Medium)*
-

4. Prioritized 12-week Roadmap (sprint-level)

- **Sprint 0 (planning, week 0–1):** Discovery interviews, PRD, wireframes, choose payment provider.
- **Sprint 1 (w1–w2):** Auth & supplier profiles, image upload infra.
- **Sprint 2 (w3–w4):** Listing CRUD, availability calendar, basic search.
- **Sprint 3 (w5–w6):** Booking flow, deposit payments (sandbox), order pages.

- **Sprint 4 (w7–w8):** In-app chat + paste-redaction + contact masking; admin basics.
 - **Sprint 5 (w9–w10):** Supplier dashboard, ratings, returns flow, dispute basics.
 - **Sprint 6 (w11–w12):** Custom request MVP, appointment scheduling, pilot onboarding readiness.
-

5. Risk Register (organized, prioritized)

Each risk has: *What it is* — *Likelihood* — *Impact* — *Priority* — *Mitigations* — *Metrics/Early warnings* — *Owner*

1) Off-platform deals (disintermediation)

- **Likelihood:** High — **Impact:** High — **Priority:** Critical
- **Mitigations:** contact masking until deposit, redact phones/emails, escrow/deposit requirement, platform guarantees (insurance/cleaning/marketing exposure) apply only on-platform, incentive programs for exclusive listings, supplier agreements with penalties, detection rules.
- **Metrics:** % cancelled after chat, chat→booking ratio, post-booking survey on-platform completion.
- **Owner:** Product / Ops / Legal

2) Logistics failures (lost/delayed shipments, cleaning delays)

- **Likelihood:** High — **Impact:** High — **Priority:** Critical
- **Mitigations:** partner vetted couriers & dry-cleaners, intake/dispatch photos, tracking & proof-of-delivery, SLA & buffer times, packaging SOPs, deposit holds for high-value items.
- **Metrics:** on-time delivery %, lost items count, cleaning turnaround time, complaints.

- **Owner:** Operations

3) Payment limitations & fraud

- **Likelihood:** High — **Impact:** High — **Priority:** Critical
- **Mitigations:** support COD/local bank transfers, trusted gateway where possible, escrow for manual payments, ID verification for large orders, limit high-value transactions until vetted.
- **Metrics:** failed payments rate, COD return rate, disputes count.
- **Owner:** Finance / Product

4) Regulatory & customs risk (proxy orders)

- **Likelihood:** Medium–High — **Impact:** High — **Priority:** Critical
- **Mitigations:** pilot with vetted agents, clear T&Cs shifting customs risk to users, restrict prohibited categories, legal counsel, require customs docs and identity.
- **Metrics:** seized shipments, customs fines, disputes over international orders.
- **Owner:** Legal / Ops

5) Fraud & identity risk (stolen goods / fake owners)

- **Likelihood:** Medium–High — **Impact:** High — **Priority:** Critical
- **Mitigations:** ID capture at intake, timestamped intake photos, digital consignment agreement, verification badges, limit new consignors' payout until first sale, spot audits.
- **Metrics:** ownership disputes, repeat flagged accounts.
- **Owner:** Ops / Trust & Safety

6) Quality control & counterfeit

- **Likelihood:** Medium — **Impact:** High — **Priority:** High
- **Mitigations:** intake inspection checklist, standardized condition codes, seller training, photo standards, delist repeat offenders.
- **Metrics:** return rate per supplier, ratings drop, complaint volume.
- **Owner:** Operations

7) Disputes & claims

- **Likelihood:** High — **Impact:** High — **Priority:** Critical
- **Mitigations:** clear damage policy, deposit sizing, photo evidence before/after, admin mediation workflow, optional insurance for high-value items.
- **Metrics:** disputes/week, avg resolution time.
- **Owner:** Customer Support / Legal

8) Supply instability (supplier churn / low inventory)

- **Likelihood:** Medium–High — **Impact:** High — **Priority:** High
- **Mitigations:** onboarding incentives, fast payouts, diversify suppliers, seed inventory if needed, analytics to show earnings.
- **Metrics:** active suppliers, churn rate, utilization rate.
- **Owner:** Merchant Success

9) Operational complexity & scale

- **Likelihood:** High — **Impact:** High — **Priority:** High
- **Mitigations:** codify SOPs, hire ops early, start manual pilots, automate incrementally.
- **Metrics:** admin backlog, time-to-fulfill, error rates.

- **Owner:** COO / Ops

10) Cybersecurity & data privacy

- **Likelihood:** Medium — **Impact:** High — **Priority:** Critical
- **Mitigations:** TLS, encrypt PII, use PCI-compliant processors, role-based access, audits & pen-tests.
- **Metrics:** security alerts, unauthorized access events.
- **Owner:** Engineering / Security

11) Platform downtime & technical failures

- **Likelihood:** Medium — **Impact:** High — **Priority:** High
- **Mitigations:** CI/CD, monitoring (Sentry), graceful degradation, backups, incident plan.
- **Metrics:** uptime, error rate, failed transactions.
- **Owner:** Engineering / DevOps

12) Reputation & culture-sensitive stigma

- **Likelihood:** Medium — **Impact:** High — **Priority:** High
- **Mitigations:** hygiene & cleaning certificates, testimonials, influencer marketing, charity/social programs, Arabic messaging.
- **Metrics:** conversion rates, negative mentions, social sentiment.
- **Owner:** Marketing

(For further risks and mitigations see Appendix A — full risk register.)

6. Top immediate actions (what to do now)

1. Draft & deploy a 1-page consignment agreement for pilot shops (digital sign). (*Owner: Legal / Ops*)
 2. Implement contact masking + paste-redaction in chat. (*Owner: Engineering*)
 3. Require ID + timestamped intake photos at consignment intake. (*Owner: Ops*)
 4. Require deposit/escrow for bookings and custom requests to unlock contact. (*Owner: Product / Finance*)
 5. Run pilot with 3 trusted shops & 1 proxy agent (manual reconciliation). (*Owner: Ops*)
 6. Produce SOPs for intake, packaging, cleaning, and POD. (*Owner: Ops*)
 7. Integrate payment gateway + COD/manual reconciliation flow. (*Owner: Finance / Engineering*)
 8. Define deposit & refund rules for damage/returns. (*Owner: Legal / Support*)
 9. Create monitoring dashboard for KPIs. (*Owner: Product / Analytics*)
 10. Start supplier onboarding kit & training materials. (*Owner: Merchant Success*)
-

7. Appendix A — Detailed risk register & mitigation matrix

(Full register available on request as CSV export for board use.)

8. Next document outputs I can produce now

- CSV backlog (features with priority & complexity) ready for import to Trello/Jira.
- One-page consignment agreement (Arabic + English) ready to sign.
- Intake checklist (PDF) for shops to use at drop-off.
- Sprint task list (tickets) for the first 4 sprints.

Which of those should I generate into the canvas next? If you want the consignment agreement or intake checklist I can generate the ready-to-use files immediately.

Continued — Expanded Immediate Actions & Practical Checklists

Below I continue from the "Integrate payment gateway + COD/manual reconciliation flow" item and expand the remaining immediate actions with practical subtasks and short checklists you can act on right away.

7) Integrate payment gateway + COD / manual reconciliation flow — Owner: Finance / Engineering

- **Objective:** support the common Syrian payment reality (COD, local bank transfers) while enabling card payments where possible and ensuring funds are tracked in escrow.
- **Subtasks:**
 - Select one online gateway (if available) and one local bank transfer provider; configure sandbox accounts.
 - Implement payment intents API (deposit, final payment, refunds) and mark payments with `escrow_flag` in DB.
 - Create COD workflow: record COD orders, require delivery confirmation photo + recipient signature; flag for manual payout reconciliation.
 - Build simple admin UI to view pending COD settlements, mark as reconciled and trigger payouts.

- Add automated email/SMS receipts for each payment status change.
- **Checklist for launch:** gateway sandbox test, COD admin view, escrow flag working, sample end-to-end deposit → booking → refund test.

8) Define deposit & refund rules for damage/returns — Owner: Legal / Support

- **Objective:** reduce disputes by having clear, enforceable rules wired into the product.
- **Minimum rules to publish:**
 - Deposit % by category (e.g., 20% for dresses under \$100, 40% for >\$200).
 - Inspection window: renter must upload return photos within 24 hours of delivery; shop inspects within 48 hours.
 - Damage thresholds & fees: minor (cleaning only), repair (deduct repair costs), severe (replace or charge full price).
 - Refund timeline: refunds issued within X business days after dispute resolution.
- **Checklist for launch:** policy text in-app, escrow hold implemented, claim submission form, admin dispute resolution workflow.

9) Create monitoring dashboard for KPIs — Owner: Product / Analytics

- **Objective:** Track early warning signals to catch issues quickly.
- **Key metrics:** bookings/day, % paid on-platform, cancellations after chat, delivery-on-time %, disputes/week, COD settlement backlog, active suppliers.
- **Implementation:** instrument events in backend (booking_created, deposit_paid, chat_redaction_flag, delivery_confirmed, dispute_opened). Connect to simple dashboard (Metabase / Grafana / Google Data Studio).
- **Checklist for launch:** event hooks in place, dashboard with 6 widgets, weekly automated digest to Slack/Email.

10) Start supplier onboarding kit & training materials — Owner: Merchant Success

- **Objective:** raise listing quality and reduce dispute rates by standardizing intake and photography.
 - **Contents:** intake checklist, photo guide (lighting, angles, close-ups), condition codes, pricing guide, packaging & cleaning SOPs, digital consignment agreement sample.
 - **Checklist for launch:** one-pager PDF, 3 short onboarding videos (phone camera, intake process, sample consignment flow), pilot training session with 3 shops.
-

Appendix B — Ready outputs I can generate now

If you want, I will create the following and add them to the same document or as separate downloadable files:

- **CSV backlog** (features with priority & complexity) ready for Trello/Jira import.
- **One-page consignment agreement** (Arabic + English) ready to sign.
- **Intake checklist (PDF)** for shops to use at drop-off with photo examples.
- **Sprint task list** (tickets) for sprints 1–4 in CSV or markdown.
- **Quick PRD** (one-page) summarizing goals, KPIs, and in-scope features for MVP.

Tell me which one to generate and I'll add it to the canvas now.
